## 1 Using the Latex template

Edit `report.tex` using a text editor of your choice and run `pdflatex report.tex` (should be available on Linux machines at Aalto / [kosh.aalto.fi](http://kosh.aalto.fi)).

## 2 Problem Description

A short summary of the problem.

## 3 Algorithm

Describe the algorithm chosen in a concise manner, that is, e.g. pseudocode and/or reference, design choices, parameters used and other relevant information, should be understandable without looking at your code!

## 4 Experiments

Present and summarize the experimental results together with the experimental settings, that is, the specs of the machine used etc.

## 5 Conclusions

Analysis of the results and reflection of your solution, that is, what was good about your solution, points for improvement, lessons learned.
